Diary of a Journey to Abyssinia, 1868

William Simpson 2002 The Expedition to Magdala of 1867-1868 was a memorable event in British Military history of warfare in general, and in the history of Ethiopia. Meticulously planned and executed, the campaign was a triumph for its commander, Sir Robert Napier. It was notable for the use of Elephants imported from India, the building of a port railway and the use of breech-loading rifles, the first time they employed in War.

The Lucifer Principle Howard K. Bloom 1995 Explores the genetic predisposition of all animals, including humans, to create hierarchies and make war on each other

Polar Castaways Richard McElrea 2004 "When Sir Ernest Shackleton's dreams of crossing Antarctica foundered with his expedition ship Endurance in the

ice of the Weddell Sea in October 1915, he could only wonder what had become of his support party on the other side of the continent." "This book tells that story. The task of the Ross Sea component of the expedition was to lay the all-important depots in support of the traverse party to be led by Shackleton." "The party was dogged from the outset by lack of finance and inadequate preparation, and matters were severely compounded when, in May 1915, their ship Aurora was carried away from its winter moorings." "This left ten men stranded and without proper equipment and supplies. At great personal hardship and cost, they laid the depots across the Ross Ice Shelf to Mt. Hope. Three men were to die during this courageous and perilous

endeavour." "Aurora, refitted in New Zealand, eventually sailed south amidst considerable controversy, to rescue the seven survivors. Polar Castaways provides the first in-depth account of the Ross Sea party, the drift of Aurora and the relief expedition under the command of polar veteran Captain J.K. Davis."--BOOK JACKET. Into the Ice Sea JaapJan Zeeberg 2005 Synthesizes several expeditions by archeologists connected with Amsterdam's Rijksmuseum in the Novaya Zemlya archipelago between 1991 and 2000 and their historical parallels of four centuries.

Backpacker 2000-03 Backpacker brings the outdoors straight to the reader's doorstep, inspiring and enabling them

to go more places and enjoy nature more often. The authority on active adventure, Backpacker is the world's first GPS-enabled magazine, and the only magazine whose editors personally test the hiking trails, camping gear, and survival tips they publish. Backpacker's Editors' Choice Awards, an industry honor recognizing design, feature and product innovation, has become the gold standard against which all other outdoor-industry awards are measured. **Polar Pioneers** Maurice James Ross 1994 In 1829 he mounted a private expedition to search for the passage, during which he became trapped in the Canadian Arctic and survived a four-year ordeal of isolation and hardship. He proved that whatever his shortcomings as an explorer, he could never be accused of lacking courage.

Commerce Business Daily 1998-10
Communication Works! Alex Whitman 1999-09 This comprehensive and practical guide to all types of communication explores the skills needed for effective reading, writing, speaking, listening, thinking critically, and collaborating. It also offers sensible advice related to certain aspects of personal development and interpersonal skills. These skills

are required for varied numerous technical and business fields—and more importantly, success in them. Topic coverage includes a basic review of grammar, spelling, handwriting and punctuation proficiency, sentence engineering and paragraph forms. Additional information focuses on organizational skills, customer service, teamwork, and self-management. Many practical applications accompany all of these concepts. For anyone in the workforce, and pre-employment or employee training programs, understanding the overall function of the enterprise, and the need for flexible, adaptive workers in a diverse human environment with an eye for global commerce.

Northwest Greenland Richard Vaughan
1991 "In Northwest Greenland, Richard Vaughan narrates for the first time the little-known history of Avanersuaq, "the place in the farthest north." This small strip on the northwestern coast of Greenland has supported the most northerly human settlement on the globe, and remains one of the last frontiers on earth. Its geography - an arid, desolate sheet of ice on one side, and the sea on the other - has isolated the land and its few inhabitants from the pressures for

change experienced in other parts of the world." "In the nineteenth century, explorers were not looking for Avanersuaq: they were en route to other goals - whale hunts off the Canadian coast, the search for the Northwest Passage, or for the missing explorer John Franklin. It is not until Robert Peary's appearance in 1891 that Northwest Greenland becomes a focal point for exploration, anthropological study, and the development of the region's resources." "Vaughan discusses all these topics, and provides information on the quest for Cape York meteorites in the late 1800s, scientific interest in the local Eskimos - the Inuhuit, as they call themselves - and Peary's expeditions across the Inland Ice sheet." "Cultural histories usually give only

cursory attention to the environment, but Vaughan integrates the people and their habitat as inextricably as they are linked in nature. Early explorers found in Avanersuaq a strange mixture of ice, desert and rock, with surprising pockets of vegetation, and wildlife that ranged from the narwhal and polar bear to the small dovekie, or little auk. The Inuhuit, they found, used their scarce resources wisely, with a lifestyle that centered on nomadic hunting." "Vaughan takes a careful look at the changes exploration and settlement brought to Avanersuaq and its people, from the prehistoric, subsistence lifestyle of the Inuhuit, to the Danish colonization of northern Greenland in the twentieth century. The construction of Thule Air Base in the 1950s is also given prominent

attention. Indeed, Americans bulk large in these pages, which describe the expeditions of Elisha Kent Kane, Isaac Hayes, and Charles F. Hall, as well as Peary's."--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. All Rights Reserved

□□□□ 2001

With Scott to the Pole Herbert George Ponting 2004 'Had we lived, I should have had a tale to tell...which would have stirred the heart of every Englishman. These rough notes and our bodies must tell the tale' Robert Falcon Scott's 'message to the

public' c. 29 March 1912 Through Beau Riffenburgh's narrative and the perfectly composed images of Herbert Ponting, With Scott to the Pole tells the story of the triumph and tragedy of Scott's 1910-13 expedition to the South Pole. Along with four companions, the explorer reached the pole only to be bitterly disappointed to discover the Norwegian flag planted there by Roald Amundsen. Scott and his men could no longer hope to secure the first attainment of the South Pole for the British Empire, and their despondency shows in the photographs that survived them. Yet with grit and courage they started on the 800 mile return from the pole. A harrowing time ensued. By the time they were within 11 miles of a depot which would have saved them they had already lost two members of

the expedition, and it was at this point that Scott and his remaining two companions were overcome by a blizzard and died. With Scott to the Pole is a fitting tribute not only to Ponting 's spell-binding aesthetic vision, but also to a magnificent story of adventure and heroism. *Land Degradation* A.J. Conacher 2013-12-11 This book contains selected contributions from the Sixth Meeting of the International Geographical Union's Commission on Land Degradation and Desertification, held in Perth, Australia, in September 1999. Collectively, these contributions explicitly seek to understand not only the mechanisms responsible for the problem of land degradation but their social and economic implications, the means of overcoming the problems, and the

policy instruments whereby remedial measures may be implemented. This breadth of approach is both distinctive and essential if the problems are to be tackled effectively. The authorship comprises of specialists (mostly geographers) from universities, research organizations, and government agencies, who provide a truly international perspective with contributions from Iceland to Australia and from the USA to Japan. Audience: The book presents current research findings which will be of particular benefit to professionals and practitioners, as well as researchers and tertiary-level educationalists who are involved with land degradation.

How to Build Supercharged and

Turbocharged Small-Block Fords Bob

McClurg 2005 The supercharger and turbocharger in their various forms and applications have both been around for well over a century. What makes them so popular? Looks, power, performance, sound, and status. And how do they relate to, and improve upon, the performance level of a

small-block Ford pushrod V-8 engine like a 289-302, a 351-Windsor, a Ford 351-Cleveland, or even the latest generation 4.6L/5.4L "modular" small-block V-8 engines? That's EXACTLY what this book is all about! While Ford dabbled in supercharging and turbocharging on production cars all the way back in 1957 with the legendary Thunderbird, and then again with Shelbys and over-the-counter kits, and then again in the late '70s and early '80s with turbocharging 4-cylinder applications in Mustangs and SHOs, the real revolution in supercharging and turbocharging Ford products has come through the aftermarket in more recent times. The Fox Mustang, created in 1979, and the platform that would eventually feature fuel injection in 1986, allowing much more boost, created a

genre of lightning-quick and affordable performance cars.
Ice Blink Scott Cookman 2000-02
Follows the trail of the expedition by Sir John Franklin, which sailed north from Greenland in 1845 with two iron-plated ships and 128 men, only to be swallowed up by the ice and snow

Dangerous Crossings John H. Bryant 2000
Interviews and addresses by influential Americans are collected here, featuring the words of Robert Ballard, Don Walsh, Ernest Borgnine, Herman Wouk, Gene Hackman, David McCullough, Shelby Foote, Jim Lovell, Walter Cronkite, and many others.
English/British Naval History to 1815
