Insect Behavior Alex Córdoba-Aguilar 2018-07-19 Insects display a staggering diversity of behaviors. Studying these systems provides insights into a wide range of ecological, evolutionary, and behavioral questions including the genetics of behavior, phenotypic plasticity, chemical communication, and the evolution of life-history traits. This accessible text offers a new approach that provides the reader with the necessary theoretical and conceptual foundations, at different hierarchical levels, to understand insect behavior. The book is divided into three main sections: mechanisms, ecological and evolutionary consequences, and applied issues. The final section places the preceding chapters within a framework of current threats to human survival - climate change, disease, and food security - before providing suggestions and insights as to how we can utilize an understanding of insect behavior to control and/or ameliorate them. Each chapter provides a concise, authoritative review of the conceptual, theoretical, and methodological foundations of each topic.

Cryogenic Two-Phase Flow N. N. Filina 1996-05-31 Cryogenic systems that involve two-phase (vapor-liquid) flows are widely used in aerospace, metallurgy, power engineering, and high energy physics research. This book describes characteristic features of cryogenic systems involving two-phase flow, creates mathematical models of these systems, and shows how the models may be used to develop optimal designs for practical cryogenic systems. The authors pay particular attention to the important topic of transient phenomena in cryogenic systems. Many examples are based on large Russian systems in space technology, energy research, and particle physics.

Advances in Plant Physiology Vol. 13 Hemantaranjan, A. 2012-10-04 The plant physiology and plant molecular biology research group has evidently endorsed the new directions taken by the treatise to attract the pre-eminent scientists in plant biology/plant sciences. Certainly, the preparation of Volume 13 of the International Treatise Series on Advances in Plant Physiology has been done entirely due to commendable contributions from Scientists of Eminence in unequivocal fields. Unquestionably, our objective is to publish innovative science of value across the broad disciplinary range of the treatise. I restate that this plan has been undertaken with a view to strengthen the indistinguishable efforts to recognize the outcome of meticulous research in some of the very sensible and stirring areas of Plant Physiology-Plant Molecular Physiology/ Biology-Plant Biochemistry for holistic development of the science of agriculture and crop production under changing climate. I am ardent to keep on the exceptionality and the prologue of excellent new ideas ensuring that the treatise calls to the best science done across the full extent of modern plant biology, in general, and plant physiology, in particular. In Volume 13, with inventive applied research, attempts have been made to bring together much needed eighteen review articles by forty-eight contributors especially from premier institutions of India for this volume. All the eighteen review articles have been grouped in five broad sections, which on the whole highlight the necessity to find out evidence from the fields of plant nutriophysiology (physiology of plant mineral nutrients) and abiotic stresses under changing climate along with their control.

The Felt Meanings of the World Associate Professor of Philosophy Quentin Smith 1986 In a critical dialogue with the metaphysical tradition from Plato to Hegel to contemporary schools of thought, the author convincingly argues that traditional rationalist metaphysics has failed to accomplish its goal of demonstrating the existence of a divine cause and moral purpose of the world. To replace the defective rationalist metaphysics, the author builds a new metaphysics on the idea that moods and affects make manifest the world's felt meanings; he argues that each feature of the world is a felt meaning in the sense that each feature is a source of a feeling-response if and when it appears. The author asserts that we must synthesize our two ways of knowing-poetic evocations and exact analyses—in order to decide which mood or affect is the appropriate appreciation of any given feature of the world. Smith gives evocative and exact explications of such features as the world's temporality, appearance, and mind-independency, as these features appear in the appropriate recitations.

Teaching Mathematics in Grades 6 - 12 Randall E. Groth 2012-08-10 Teaching Mathematics in Grades 6 - 12 by Randall E. Groth explores how research in mathematics education can inform teaching practice in grades 6-12. The author shows preservice mathematics teachers the value of being a "researcher—constantly experimenting with methods for developing students' mathematical thinking—and connecting this research to practices that enhance students' understanding of the material. Ultimately, preservice teachers will gain a deeper understanding of the types of mathematical knowledge students bring to school, and how students' thinking may develop in response to different teaching strategies.

Civil War Extra: A newspaper history of the Civil War from Nat Turner to 1863 Eric Carren 1999 This two-volume collection of newspapers is one of the most important Civil War publications ever produced, and it brings the events of the war vividly in focus. A unique, of-the-moment perspective, it begins with the Nat Turner slave insurrection and covers every battle -- many by the local papers for a truly firsthand, up-close view. Lincoln's election, inauguration, and assassination are given full coverage. Carren's extensive collection includes many extremely rare Southern editions which would never be seen except in this remarkable publication. Loaded with engravings depicting battles, military leaders, and maps, this is an absolutely essential addition to any enthusiast's collection.

Regenerative Medicine Niranjana Bhattacharya 2014-11-07 This book represents a major contribution to the emerging science of regenerative medicine using non-fetal sources of stem cells. The Editors, Dr Niranjana Bhattacharya and Professor Phillip Stubblefield, have brought together some of the most pre-eminent scientists working on regenerative medicine to share information on currently ongoing work in this area alongside unpublished observations that will help to shape the contours of future therapies. *Regenerative Medicine: Using Non-Fetal Sources of Stem Cells* discusses the potential clinical and therapeutic applications using non-fetal stem cells as well as providing instruction on the collection, isolation and characterization of stem cells from various non-fetal sources, such as menstrual blood, adipose tissue, breast milk and uprooted deciduous teeth. This book will be an invaluable resource for both active researchers and those entering the field. The Editors truly hope that the text will act as a stimulant to professionals and clinical scientists, who may be inspired to further the work of the pioneering scientists who have contributed to this volume.

Grotendeels ongevaarlijk Douglas Adams 2011-10-07 Het Transgalactisch Lijfershandboek (Engels: The Hitchhikers Guide to the Galaxy) is een komisch sciencefictionfranchise bedacht door Douglas Adams. Het begon als een radiohoorspel van twaalf afleveringen, voor het eerst uitgezonden in 1978 door BBC Radio, daarna door de BBC World Service. In 1981 werd er een zesdelige televisieserie gemaakt. Al snel volgden andere media, waaronder een computerspel, drie

toneelbewerkingen, negen graphic novels, een speelfilm en heel veel merchandise. De boekenserie was echter het succesvolst: tussen 1979 en 1992 verschenen vijf delen van de reeks. In 2008 kreeg auteur Eoin Colfer toestemming van de weduwe van Douglas Adams om de reeks af te maken met een zesde deel dat dit jaar in het Nederlands verschijnt: En
