Ask the Astronaut Tom Jones 2016-03-22 Ever wondered what space is really like? Thanks to his 25 years of training for, flying in, consulting on, and writing and speaking about space, astronaut and spacewalker Tom Jones can answer that question and many others. What do you feel on liftoff? What is weightlessness? Where do you sleep in space? Can you see the Great Wall of China? Jones answers every question you have ever had about space in Ask the Astronaut. His entertaining blend of wit, personal experience, and technical expertise shines in each answer, and together all the answers illuminate the true space experience from start to finish. His engaging and informative responses remind readers of historic space achievements, acquaint them with exciting new ambitions, make them feel like they have experienced space firsthand, and even inspire an urge to explore space themselves. Jones covers everything from the training process for new astronaut candidates and the physical sensations and challenges of rocketing into orbit to what it's like to live, work, and walk in space. Jones also explores the future of spaceflight, both professional and commercial, in the years to come. Ask the Astronaut is a delight for all readers, especially "armchair astronauts" and younger, 21st century space explorers.

Why Great Leaders Don't Take Yes for an Answer Michael A. Roberto 2013-05-02 Make better decisions! Michael A. Roberto will help you achieve deeper consensus, get past groupthink and "yes men," and achieve superior results in every decision you make -- especially your most complex and highest-stakes decisions! Roberto's Why Great Leaders Don't Take Yes for an Answer, Second Edition gives you a powerful framework for promoting honest, constructive dissent and skepticism; test your assumptions; more thoroughly and fairly considering "best alternatives"; crisply coming to closure; and aligning your entire organization behind the decision you make. In this new edition, Roberto presents new cases from Google, Ford, and Intuit, and expands coverage to more deeply illuminate his decision-making approach. Offering both positive and negative examples, he presents a well rounded view of how to determine when 'yes' means 'yes', when it doesn't, and what to do when it doesn't. Throughout, Roberto demonstrates why "good process entails the

astute management of the social, political and emotional aspects of decision making" -- in other words, why effective leaders are well served by carefully "deciding how to decide." You'll learn how to: Test and probe what your team really believes, and get the truth and candor you really need Encourage constructive objections -- and keep them constructive Improve team management, mitigate risk, identify opportunities, and promote integrity Build stronger commitment amongst the people who'll implement your decisions

Beyond the Usability Lab William Albert 2009-12-21 Usability testing and user experience research typically take place in a controlled lab with small groups. While this type of testing is essential to user experience design, more companies are also looking to test large sample sizes to be able compare data according to specific user populations and see how their experiences differ across user groups. But few usability professionals have experience in setting up these studies, analyzing the data, and presenting it in effective ways. Online usability testing offers the solution by allowing testers to elicit feedback simultaneously from 1,000s of users. *Beyond the Usability Lab* offers tried and tested methodologies for conducting online usability studies. It gives practitioners the guidance they need to collect a wealth of data through cost-effective, efficient, and reliable practices. The reader will develop a solid understanding of the capabilities of online usability testing, when it's appropriate to use and not use, and will learn about the various types of online usability testing techniques. *The first guide for conducting large-scale user experience research using the internet *Presents how-to conduct online tests with 1000s of participants – from start to finish *Outlines essential tips for online studies to ensure cost-efficient and reliable results

Survey of Astronomy Parent Lesson Plan 2013-10-01 Course Description: Taking Back Astronomy: Take a breathtaking look at the universe in this comprehensive guide to the heavens! Sit back and explore the world at your fingertips. This book explains the scale and size of the universe that is hard for our minds to imagine, yet can only indicate the Master's hand at work. Marvel at over 50 full-color, rarely seen photos of stars, nebulae, and galaxies. Study the facts that challenge secular theories and models of the universe-how it began and how it continues to amaze the scientific community. Explore numerous evidences that point to a young universe: magnetic poles of planets, the spiral shape of galaxies, comets and how long scientists think they can last, and much more. Step out among the stars and experience the truly awesome power of God through this glimpse of His vast creation. Our Created Moon: For eons the moon has intrigued humanity. From its creation through the current issues of space exploration the moon has been both a light in the night and a protective shield of earth placed perfectly by God, regulating our seasons and keeping our atmosphere purified. Billions of dollars have been spent to reach its surface and discover its secrets; open these pages and discover those secrets for yourself. The Stargazer's Guide to the Night Sky: Explore the night sky, identify stars, constellations, and even planets. Stargaze with a telescope, binoculars, or even your naked eye. Allow Dr. Jason Lisle, a research scientist with a masters and PhD in astrophysics, to guide you in examining the beauty of God's Creation with 150 full color star-charts. Learn the best ways and optimal times to observe planets and stars with easy to use illustrations. Create or expand the hobby of stargazing; an outdoor, educational hobby to enjoy with friends or family. Our Created Moon DVD: In this illustrated presentation, Dr. Don DeYoung looks at four of the most popular ideas evolutionists have to offer regarding the moon's origin, and logically concludes that this "lesser light" could only have been placed in its orbit by an all-knowing, all-powerful Creator. Created Cosmos DVD: Our universe is truly an amazing thing. The vastness of space boggles the mind, and the beauty of diversity we find there points to a Creator. The Psalmist wrote, "When I consider Your heavens, the work of Your fingers, the moon and the stars, which You have ordained, what is man that You are mindful of him, and the Son of man that You visit him?" Take a tour through the universe during this awe-inspiring presentation.

Fundamentals of Qualitative Research Kakali Bhattacharya 2017-03-16 This book is the road map to proficiency and development in the field of qualitative research. Borrowing from a wealth of experience teaching introductory qualitative research courses, author Kakali Bhattacharya lays out a dynamic program for learning different paradigms of inquiry, empowering students to recognize the convergence

of popular research methodologies as well as the nuances and complexities that set each of them apart. Her book: supplements the readings and activities in a qualitative methods class, exposing students to the research process and the dominant types of qualitative research; introduces a variety of theoretical perspectives in qualitative research, including positivism and postpositivism, interpretivism, feminism, symbolic interactionism, phenomenology, hermeneutics, critical theory, and Critical Race Theory; identifies and summarizes the three dominant methodological approaches in qualitative research: narrative inquiry, grounded theory, and ethnography; provides interactive activities and exercises to help students crystallize their understanding of the different topics in each chapter.

Popular Science 1970-10 Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.

An Annotated Bibliography of the Apollo Program Roger D. Launius 2022-08-10 During and since the completion of the Apollo 11 landing twenty-five years ago numerous books, studies, reports, and articles have been written about the project. This selective, annotated bibliography discusses primarily those works judged to be most essential for researchers seeking to learn more about the Apollo program's varied history. A thematic arrangement of material concerning the project will, it is hoped, bring clarity and simplicity to such a complex subject. An index concludes this work.

Do Your Ears Pop in Space? and 500 Other Surprising Questions about Space Travel R. Mike Mullane 1997-02-05 "An excellent reference. This book has to be on the shelf of every space buff." --James Lovell, Commander, Apollo 13. Get the inside

story on outer space from three-time shuttle astronaut R. Mike Mullane. "A fascinating collection of honest, factual, from-the-heart answers to the most often asked questions about spaceflight and spacefliers. Required reading for all who aspire to travel in space." --Kathy Thornton, 4-mission Shuttle Astronaut, World Record Holder for Spacewalks by a Woman. "A brilliant addition to the understanding of space flight. Only a man who has been there--outer space--and done that--fly the Space Shuttle--could render the complexities of flying in space so lucidly." --Walter J. Boyne, Colonel, USAF (Ret.), Former Director, National Air and Space Museum. "A highly informative inside view of what astronauts really experience in space." --Ed Buckbee, Former Director, U.S. Space & Rocket and U.S. Space Camp. "All astronauts have been peppered with great questions. Mike Mullane has great answers." --Vice Admiral Richard H. Truly, U.S. Navy (Ret.), Columbia 1981, Challenger 1983, NASA Administrator 1989-1992.

The Apollo 13 Mission Judy L. Hasday 1999-12 Describes the ill fated flight of Apollo 13 when an explosion forced the crew to abandon plans for a lunar landing and embark on a dangerous journey back to Earth.
