America on the Couch Pythia Peay 2015-04-01 What lies behind America's historic romance with the gun? Why does it have such a troubled relationship with alcohol and drugs? Why is it so wedded to consumerism and so resistant to the evidence of climate change? What are its enduring myths about individuality, freedom, and independence, and how might we re-imagine our vision of the United States as the "Promised Land" and "The City on the Hill" to reflect a multiculturalism that offers "the last, best hope" for the world? In a two-decades long journey through the American psyche, depth journalist Pythia Peay has asked these and many more questions of no fewer than thirty-six of the world's leading psychologists and psychoanalysts. From Robert Jay Lifton to Marion Woodman, A. Thomas McLellan to Judith V. Jordan, Mihaly Csikszentmihalyi to June Singer, and James Hillman to Mary Pipher, the thinkers in America on the Couch discuss violence, addiction, the environment, capitalism and consumerism, politics and power, and the soul of America. The result is a uniquely comprehensive, wide-ranging, and compelling kaleidoscope of insights into the psychodynamics of a hegemon in peace and at war, as it confronts the shadows of the American century and charts its way into an uncertain, multi-polar future. Featuring Stephen Aizenstat, John Beebe, Bonnie Bright, Gary S. Bobroff, Mihaly Csikszentmihalyi, Philip Cushman, Larry Decker, Raymond De Young, Edward Edinger, Michael Eigen, Stephen J. Foster, Charles Grob, Bud Harris, A. Chris Heath, James Hillman, Judith V. Jordan, Donald Kalsched, Robert J. Langs, Linda Schierse Leonard, Harriet Lerner, Robert Jay Lifton, A. Thomas McLellan, Thomas Moore, Ginette Paris, Mary Pipher, Ernest Rossi, Andrew Samuels, Erel Shalit, June Singer, Thomas Singer, Lawrence Staples, Murray Stein, Charles B. White Bird, Black Serpent, Red Book Stuart Douglas 2018-04-17 This book examines the influence of Gnostic philosophy on Jungian psychology as indicated by Jung's essay, 'The Transcendent Function' (1916), and his Gnostic-inspired treatise, The Seven Sermons to the Dead (also written in 1916). Relevant and timely due to the relatively recent publication of Jung's The Red Book, the hypothesis of this work is that the Seven Sermons is the mythopoetic, metaphysical twin of 'The Transcendent Function' and that these texts can be considered as two sides of the same coin. The Seven Sermons formed a prelude to everything Jung was to communicate about the unconscious—in other words, an embryonic form of the principal tenets of analytical psychology can be found in a Gnostic-inspired text. As Gnostic philosophy was the inspiration for both texts, this book also highlights correspondences between both of Jung's works and the Gnostic texts of

the Nag Hammadi Library, paying particular attention to the theme of the opposites—arguably the crucial theme at the very heart of Jung's psychology.

The Word as True Myth Gary J. Dorrien 1997-01-01 Gary Dorrien follows the threads of theology through the twentieth century, examining how Christians have reconciled their myth-filled religious beliefs within a world secularized by Enlightenment criticism and science. To understand how religion keeps its place in Christians' lives, Dorrien writes, we must explore how modern theologians have answered the question of myth in today's Christianity. Dorrien's narrative walks readers through modern theology – stopping with each of the major thinkers along the way to see how they dealt with the issue of modern Christian mythology. Ultimately he offers his own "new neo-orthodoxy", a theology of Word and Spirit that is pluralistic and affirms the mythical character of the gospel while holding fast to the Gospels' myth-negating condemnation of idolatry and their focus on history.

Boundaries of the Soul June K. Singer 1973

Human Development and Faith (Second Edition) Felicity Kelcourse 2015-07-28 This book, now in its second edition, brings together the best available understandings of human development from a multidisciplinary perspective. Uniquely inclusive of the moral and faith dimensions of context and life-cycle development, Human Development and Faith examines the interplay of mind, body, family, community, and soul at every stage of development. It addresses two central questions: What are the "good-enough" conditions of parenting, family, and community in each phase of life, from birth to death, that support growth and development? What gives life adequate meaning as development proceeds? If human development describes the normative and hoped-for passages of life, then faith provides the necessary component of meaning. Throughout the various perspectives offered in this volume is the premise that faith is that quality of living that makes it possible to fully live. The Journal of Pastoral Theology called the first edition of Human Development and Faith "an excellent text for pastoral theology courses, because it fulfills its ambitious goal of bringing a holistic faith perspective to the usual topics of development." This second edition includes a new chapter on infancy, updates reflecting our growing awareness of cultural diversity, and a new preface.

Public Relations Ethics and Professionalism Johanna Fawkes 2014-08-01 Do professions really place duty to society above clients' or their own interests? If not, how can they be trusted? While some public relations (PR) scholars claim that PR serves society and enhances the democratic process, others suggest that it is little more than propaganda, serving the interests of global corporations. This is not an argument about definitions, but about ethics – yet this topic is barely explored in texts and theories that seek to explain PR and its function in society. This book places PR ethics in the wider context of professional ethics and the sociology of professions. By bringing together literature from fields beyond public relations – sociology, professional and philosophical ethics, and Jungian psychology – it integrates a new body of ideas into the debate. The unprecedented introduction of Jungian psychology to public relations scholarship shifts the debate beyond a traditional Western 'Good/Bad' ethical dichotomy

towards a new holistic approach, with dynamic implications for theory and practice. This thought-provoking book will be essential reading for students, academics and professionals with an interest in public relations, ethics and professionalism.

Post-Jungian Criticism James S. Baumlin 2004-01-01 Rereads Jung in light of contemporary theoretical concerns, and offers a variety of examples of post-Jungian literary and cultural criticism.

Transrational Peace Research and Elicitive Facilitation Norbert Koppensteiner 2020-06-22 This book sheds new light on transrational approaches to peace research and highlights elicitive approaches to facilitation. Rather than encouraging researchers, teachers and practitioners to control and suppress their own positionality, the book argues that they can see themselves as a potential (re)source that can be creatively tapped for their work. Using dance as a central metaphor, it seeks to reposition research and facilitation as a truly experiential process where the entirety of human experiences and epistemologies can be brought into interplay, opening up new sources of knowledge. Providing a cutting-edge theoretical framework and based on his practical experience, the author demonstrates that facilitation and research are not just cognitive, but can also be (come) embodied, emotional, intuitive, relational and spiritual. By proposing a systematic, methodological framework for research and facilitation, the book offers practical guidance for peace practitioners, facilitators and researchers interested in working through all dimensions of their being and engaging with conflict transformation in a holistic way.

The Lawyer's Myth Walter Bennett 2010-02-15 Lawyers today are in a moral crisis. The popular perception of the lawyer, both within the legal community and beyond, is no longer the Abe Lincoln of American mythology, but is often a greedy, cynical manipulator of access and power. In The Lawyer's Myth, Walter Bennett goes beyond the caricatures to explore the deeper causes of why lawyers are losing their profession and what it will take to bring it back. Bennett draws on his experience as a lawyer, judge, and law teacher, as well as upon oral histories of lawyers and judges, in his exploration of how and why the legal profession has lost its ennobling mythology. Effectively using examples from history, philosophy, psychology, mythology, and literature, Bennett shows that the loss of professionalism is more than merely the emergence of win-at-all-cost strategies and a scramble for personal wealth. It is something more profound—a loss of professional community and soul. Bennett identifies the old heroic myths of American lawyers and shows how they informed the values of professionalism through the middle of the last century. He shows why, in our more diverse society, those myths are inadequate guides for today's lawyers. And he also discusses the profession's agony over its trickster image and demonstrates how that archetype is not only a psychological reality, but a necessary component of a vibrant professional mythology for lawyers. At the heart of Bennett's eloquently written book is a call to reinvigorate the legal professional community. To do this, lawyers must revive their creative capacities and develop a meaningful, professional mythology—one based on a deeper understanding of professionalism and a broader, more compassionate ideal of justice.

The Adult Development of C.G. Jung (RLE: Jung) John-Raphael Staude 2014-07-17

Originally published in 1981, this study presents Jung's theory of adult personality development, and analyses and interprets in its biographical and historical context the genesis and development of Jung's theory of the individuation process. Dr Staude argues that an in-depth study of Jung's life offers insights into the patterns and processes of adult development, and he focuses particularly on Jung's writings during and immediately after his mid-life transition. He shows how Jung articulated his hard-won insights into adult development in his books and essays and into his analytic practice, and considers how Jung's developmental theory relates to the changes he experienced in his own life and in his socio-historical environment. Dr Staude concludes that Jung's emphasis on impersonal universals of human psychic development complements and supplements the personal emphasis of ego development theory and provides the foundations for a more holistic understanding of adult developmental psychology.

Shadow Working in Project Management Joana Bertholo 2017-07-06 Shadow Working in Project Management aims at contributing to our knowledge of all things unconscious and irrational in our behaviour. It takes the form of an empirical research, and therefore addresses mostly the tools and techniques available to get in touch with Shadow aspects of self and collective, to recognize how it manifests, how it can lead to conflict, and ways to address it. From that perspective, it advances on to question the underlying beliefs of current management practices. It explores as well the inherent need for control in projects, being those of a professional nature, or other ventures. It challenges the strength of the concept of the "rational man" and its protagonism. Joana Bertholo's work explores the role and nature of the Shadow in the context of projects and their management, with an emphasis on techniques to address it. Despite being directed to managers and dedicated to the analyses of the managerial discourse, the tools and processes it proposes have universal relevance, based on the fact that the Shadow is everywhere, within everyone, from the individual to the global scale.

Alchemy, Jung, and Remedios Varo Dennis Pottenger 2021-05-04 Alchemy, Jung, and Remedios Varo offers a depth psychological analysis of the art and life of Remedios Varo, a Spanish surrealist painter. The book uses Varo's paintings in a revolutionary way: to critique the patriarchal underpinnings of Jungian psychology, alchemy, and Surrealism, illuminating how Varo used painting to address cultural complexes that silence female expression. The book focuses on how the practice of alchemical psychology, through the power of imagination and the archetypal Feminine, can lead to healing and transformation for individuals and culture. Alchemy, Jung, and Remedios Varo offers the first in-depth psychological treatment of the role alchemy played in the friendship between Varo and Leonora Carrington—a connection that led to paintings that protest the pitfalls of patriarchy. This unique book will be of great interest for academics, scholars, and post-graduate students in the fields of analytical psychology, art history, Surrealism, cultural criticism, and Jungian studies.

Communities of the Heart Warren Rochelle 2001-01-01 Through story, through myth, through science fiction and fantasy, he argues, Le Guin takes us into her communities of the heart, communities that are truly human." "Le Guin's rhetoric, when placed in historical and sociocultural context, becomes the rhetoric of Emerson, Thoreau, Peirce, and Dewey: American romantic/pragmatic rhetoric - a rhetoric that argues for value to be given to the subjective, the personal and private, the small, and the feminine. Rochelle studies Le Guin's Earthsea cycle, The Dispossessed, The Left Hand of Darkness, Always Coming Home, Four Ways to Forgiveness, A Fisherman of The Inland Sea, two recent novellas, Dragonfly and Old Music and the Slave Women, and selected short stories. The theorists of language, culture and myth discussed include Susanne Langer, Kenneth Burke, Lev Vygotsky, Walter Fisher, Carl Jung and Joseph Campbell."--BOOK JACKET.

Jung and Kierkegaard Amy Cook 2017-08-24 Jung and Kierkegaard identifies authenticity, suffering and self-deception as the three key themes that connect the work of Carl Jung and Søren Kierkegaard. There is, in the thinking of these pioneering psychologists of the human condition, a fundamental belief in the healing potential of a religious outlook. This engaging and erudite text explores the significance of the similarities of thinking between Kierkegaard and Jung, bridging the gap between the former's particular brand of existential Christian psychology and the latter's own unique philosophy. Given the similarity of their work and experiences that were common to both of their personal biographies, particularly the relationship that each had with his father, one might expect Jung to have found in Kierkegaard a kindred spirit. Yet this was not the case, and Jung viewed Kierkegaard with great scorn. That there exists such a strong comparison and extensive overlap in the life and thought of these towering figures of psychology and philosophy leads us to question why it is that Jung so strongly rejected Kierkegaard. Such hostility is particularly fascinating given the striking similarity that Jung's own analytical psychology bears to the Christian psychology upheld by Kierkegaard. Cook's thought-provoking book fills a very real gap in Jungian scholarship and is the first attempt to undertake a direct comparison between Jung and Kierkegaard's models of development. It is therefore essential reading for academics and postgraduate students with an interest in Jungian and Kierkegaard scholarship, as well as psychology, philosophy and religion more generally.

Map of the Soul - 7 Murray Stein 2020 "Beyond summarizing the three volumes on Persona, Shadow and Ego in the Map of the Soul series, this latest book explores the entire BTS album, start to finish, revealing profound insights into the collective psyche of BTS. The title of BTS's latest album, Map of the Soul: 7, captivates the mind with its suggestive and alluring imagery. It came as a surprise to many fans. Expected was an album that would follow upon Map of the Soul: Persona with songs about Shadow or Ego. While the new album does indeed include songs with these themes, it is much more complex and broader in vision than expected. The number 7 suggests mystery. It catches the mind's attention with its symbolic significance. What does this number mean in relation to the idea of a "map of the soul?" This book dives into this mystery and explores the unconscious reaches of our mind. Fans of BTS from around the world will marvel at the depth of meaning in the songs contained in Map of the Soul: 7. They take the listener into deep reflection upon the meaning of striving and ambition, the dangers of worldly success, and the amazing resiliency of the human spirit to recover and go on

despite the pitfalls on life's journey. The songs themselves function as a map for souls who are setting out in life and engaging in challenging relationships. The songs are reflective, mirroring what we find within ourselves in our struggles to become and to thrive. When you stand on the threshold of a new land, it is useful to have a map as your guide. The great psychologist of the 20th Century, Carl Jung, created a Map of the Soul that many people in his time found more than a little helpful, even lifesaving. It is even more so now, for people in the 21st Century, caught in the profound complexities of modern life. Armed with this map, people are better able to find their way successfully through life's journey. Today, BTS is putting this map into the hands of their fans. For this great service we are profoundly very grateful"--

The Tao of Jung David H. Rosen 2019-03-25 This work tracks Carl Jung's life and spiritual development as the embodiment of the way of the Tao. Jung was well acquainted with the body of Tao knowledge—in his later years he was close to and worked with Wilhelm, a translator of the I Ching. Rosen finds that Jung's life and his psychology reveal the Tao at work. His description of the natural world of the psyche is similar to the natural world as described by Taoists. The essence of both philosophies is that the integration of opposites, such as shadow/persona and yin/yang, leads to wholeness. The Tao, Rosen holds, enabled Jung, who started out as a Freudian, to leave Freud in the major crisis of his life and to end up a more complete person. Rosen's book is modeled on the Tao Te Ching itself and invites readers to further explore the connection between Tao and Jung by looking to the works of the two themselves.

Map of the Soul – Persona Murray Stein 2019-05-16 There is a lot of interest in today's culture about the idea of Persona and the psychological mapping of one's inner world. In fact, the interest is so strong that the superstar Korean Pop band, BTS, has taken Dr. Murray Stein's concepts and woven them into the title and lyrics of their latest album, Map of the Soul:Persona. What is our persona and how does it affect our life's journey? What masks do we wear as we engage those around us? Our persona is ultimately how we relate to the world. Combined with our ego, shadow, anima and other intra-psyche elements it creates an internal map of the soul. T.S. Eliot, one of the most famous English poets of the 20th Century, wrote that every cat has three names: the name that everybody knows, the name that only the cat's intimate friends and family know, and the name that only the cat knows. As humans, we also have three names: the name that everybody knows, which is the public persona; the name of that only your close friends and family know, which is your private persona; and the name that only you know, which refers to your deepest self. Many people know the first name, and some people know the second. Do you know your secret name, your individual, singular, unique name? This is a name that was given to you before you were named by your family and by your society. This name is the one that you should never lose or forget. Do you know it?

Blake, Jung, and the Collective Unconscious June Singer 2000-03-01 In this thoughtful discussion of Blake's well-known Marriage of Heaven and Hell, Singer shows us that Blake was actually tapping into the collective unconscious and giving form and voice to primordial psychological energies, or archetypes, that he experienced in his inner and outer world. With clarity and wisdom, Singer examines the images and words in each plate of Blake's work, applying in her analysis the concepts that Jung brought forth in his psychological theories.

Jung's Personality Theory Quantified Douglass J. Wilde 2011-01-06 Jung's Personality Theory Quantified fills an urgent need for professionals using the Myers-Briggs Type Indicator® (MBTI) to map it on to the cognitive modes of Jung's personality theory, avoiding potential logical errors in the traditional "type dynamics" method. It furthers Jung's original concepts while placing them on a solid axiomatic basis not possessed by other personality theories. Bringing these quantitative findings to the millions of MBTI users – managers, consultants, counsellors, teachers, psychoanalysts and human resource professionals – will require further education of those already certified to administer the instrument according to type dynamics. For this reason numerical exercises follow most chapters to make the book a source reference for briefer workbooks usable in enhanced certification programs. Backed by quantitative theory and new graphical

methods, the pioneering qualitative typology work of Myers and Briggs is thus extended to yield deeper understanding of the vital topics of human personality, creativity and human relations. Jungian psychoanalysts may find Jung's Personality Theory Quantified helpful in organizing complicated clinical information and it can also enhance the work of MBTI practitioners worldwide.

Map of the Soul-ego Murray Stein 2020 In *Map of the Soul - Ego: I Am*, Dr. Murray Stein explores the beginnings of consciousness and the concept of the "I," as well as the evocative lyrics from the Korean Pop band BTS's album, *Map of the Soul: 7*. BTS's album series titled *Map of the Soul* was largely inspired by Dr. Stein's presentation of C.G. Jung's groundbreaking psychological insights. Ego is the center of consciousness. This book is an overview of the ego from a Jungian perspective but also is a rich and nuanced examination of how the creative spark can ignite and sustain meaningful psychological growth. The author and collaborators are deeply indebted to BTS, whose world-wide popularity points to their remarkable ability to tap into universal themes. BTS's music inspired this work and this introductory series of books may inspire others to explore their inner life. Table of Contents 1. Introduction 2. BTS and *Outro: Ego* 3. With new information on multiculturalism, diversity, and cutting-edge theories such as psychosynthesis, the book offers a detailed description of the philosophical basis for each theory as well as historical context and biographical information on each theory's founder. Chapters include new case excerpts and clinical examples, and each chapter follows a consistent structure in its exploration of each theory's features, including its approach to and ideas on personality development, human nature, the role of environment, the change process in therapy, and contributions and limitations to the mental health field. Theory-specific information on diagnosis, psychopharmacology, spirituality, and gender issues is also discussed, and the book is accompanied by a companion website where professors and students will find exercises and course material that will further deepen their understanding of counseling theory and allow them to easily bridge classroom study to future practice. Available for free download for each chapter: PowerPoint slides and a testbank of 21 multiple-choice questions

Mythos and Logos in the Thought of Carl Jung Walter A. Shelburne 1988-01-01 The author explores and defends the bold thesis that the idea of the collective unconscious can be reconciled with a scientific world outlook as he sketches a big picture from Jung's psychological viewpoint. In his examination of Jung's archetypes, Shelburne considers the chief critical views of the scientific import of Jung's thesis as he discusses the issue of rationality posed by the theory. There is also a discussion of how the ideas of James Hillman contrast with those of Jung on the issue of the scientific nature of archetypes. Shelburne presents scientific evidence for the existence of archetypes and shows how the theory fits in with modern evolutionary biology.
