Algebra: Beginning and Intermediate Richard N. Aufmann 2012-01-02 Intended for combined introductory and intermediate algebra courses, this

text retains the hallmark features that have made the Aufmann texts market leaders: an interactive approach in an objective-based framework: a clear writing style, and an emphasis on problem-solving

strategies. The acclaimed Aufmann Interactive Method, allows students to try a skill as it is introduced with matched-pair examples, offering students immediate feedback, reinforcing the concept, identifying problem areas, and, overall, promoting student success. Introductory Algebra for College Students Value Pack (includes Student Solutions Manual and Worksheets for Classroom Or Lab Practice) Robert Blitzer

2008-04-24

Introductory Algebra: An Applied Approach Richard N. Aufmann 2012-12-13 As in previous editions, the focus in INTRODUCTORY ALGEBRA remains on the Aufmann Interactive Method (AIM). Students are encouraged to be active participants in the classroom and in their own

studies as they work through the How To examples and the paired Examples and You Try It problems. Student engagement is crucial to success. Presenting students with worked examples, and then providing them with the opportunity to immediately solve similar problems, helps them build their confidence and eventually master the concepts. Simplicity is key in the organization of this edition, as in all other editions. All lessons, exercise sets, tests, and supplements are organized around a carefully constructed hierarchy of objectives. Each exercise mirrors a preceding objective, which helps to reinforce key concepts and promote skill building. This clear, objective-based approach allows students to organize their thoughts around the content, and supports instructors as they work to design syllabi, lesson plans, and other administrative documents.

Intermediate Algebra Laura Bracken 2013-01-08 Intermediate Algebra offers a practical approach to the study of intermediate algebra concepts, consistent with the needs of today's student. The authors help students to develop a solid understanding of functions by revisiting key topics related to functions throughout the text. They put special emphasis on the worked examples in each section, treating them as the primary

means of instruction, since students rely so heavily on examples to complete assignments. The applications (both within the examples and exercises) are also uniquely designed so that students have an experience that is more true to life--students must read information as it appears in headline news sources and extract only the relevant information needed to solve a stated problem. The unique pedagogy in the text focuses on promoting better study habits and critical thinking skills along with orienting students to think and reason mathematically.

Through Intermediate Algebra, students will not only be better prepared for future math courses, they will be better prepared to solve problems and answer questions they encounter in their own lives. Available with InfoTrac Student Collections

Tussy 2014-01-31 Offering a uniquely modern, balanced approach, Tussy/Koenig's **INTRODUCTORY ALGEBRA**, Fifth Edition, integrates the best of traditional drill and practice with the best elements of the reform movement. To many developmental math students, algebra is like a foreign language. They have difficulty translating the words, their meanings, and how they apply to problem solving. Emphasizing the "language of algebra," the text's fully integrated learning process is designed to expand students' reasoning abilities and teach them how to read, write, and think mathematically. It blends instructional approaches that include vocabulary, practice, and well-defined pedagogy with an emphasis on reasoning, modeling, communication, and technology

skills. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Algebra: Connecting Concepts Through Applications

Mark Clark 2012-01-01 BEGINNING

AND INTERMEDIATE

ALGEBRA: CONNECTING

CONCEPTS THROUGH

APPLICATIONS, shows students

how to apply traditional

mathematical skills in real-world

contexts. The emphasis on skill

building and applications engages

students as they master algebraic

concepts, problem solving, and

communication skills. Students

develop sound mathematical

skills by learning how to solve

problems generated from realistic

applications, instead of learning

techniques without conceptual

understanding. Authors Mark

Clark and Cynthia Anfinson have

developed several key ideas to

make concepts real and vivid for

students. First, the authors place

an emphasis on developing

strong algebra skills that support

the applications, enhancing

student comprehension and

developing their problem solving

abilities. Second, applications are

integrated throughout, drawing

on realistic and numerically

appropriate data to show students

how to apply math and to

understand why they need to

know it. These applications

require students to think

critically and develop the skills

needed to explain and think

about the meaning of their

answers. Third, important

concepts are developed as

students progress through the

course and overlapping

elementary and intermediate

content in kept to a minimum.

Chapter 8 sets the stage for the

intermediate material where

students explore the eyeball best-

fit approach to modeling and

understand the importance of

graphs and graphing including

graphing by hand. Fourth, Mark

and Cynthia's approach prepares

students for a range of courses

including college algebra and

statistics. In short, BEGINNING

AND INTERMEDIATE

ALGEBRA: CONNECTING CONCEPTS THROUGH APPLICATIONS develops strong mathematical skills using an engaging, application-driven and problem solving-focused approach to algebra. Intermediate Algebra Richard N. Aufmann 2012-01-01 Intended for developmental math courses in intermediate algebra, this text retains the hallmark features that have made the Aufmann texts market leaders: an interactive approach in an objective-based framework: a clear writing style, and an emphasis on problem-solving strategies. The acclaimed Aufmann Interactive Method, allows students to try a skill as it is introduced with matched-pair examples, offering students immediate feedback, reinforcing the concept, identifying problem areas, and, overall, promoting student success. Introductory Algebra: Everyday Explorations Alice Kaseberg 2012-01-27

Kaseberg/Cripe/Wildman's respected INTRODUCTORY

ALGEBRA is known for an informal, interactive style that makes algebra more accessible to students while maintaining a high level of mathematical accuracy. This new edition introduces two new co-authors, Greg Cripe and Peter Wildman. The three authors have created a new textbook that introduces new pedagogy to teach students how to be better prepared to succeed in math and then life by strengthening their ability to solve critical-thinking problems. This text's popularity is attributable to the author's use of guided discovery, explorations, and problem solving, all of which help students learn new concepts and strengthen their skill retention. previous editions, the focus in INTERMEDIATE ALGEBRA remains on the Aufmann Interactive Method (AIM). Students are encouraged to be active participants in the classroom and in their own studies as they work through the How To examples and the paired Examples and You Try It problems. Student engagement is crucial to success. Presenting students with worked examples, and then providing them with the opportunity to immediately solve similar problems, helps them build their confidence and eventually master the concepts. Simplicity is key in the organization of this edition, as in all other editions. All lessons, exercise sets, tests, and supplements are organized around a carefully constructed hierarchy of objectives. Each exercise mirrors a preceding objective, which helps to reinforce key concepts and promote skill building. This clear,

objective-based approach allows students to organize their thoughts around the content, and supports instructors as they work to design syllabi, lesson plans, and other administrative documents. New features like Focus on Success, Apply the Concept, and Concept Check add an increased emphasis on study skills and conceptual understanding to strengthen the foundation of student success. The Ninth Edition also features a new design, enhancing the Aufmann Interactive Method and making the pages easier for both students and instructors to follow.

Introductory and Intermediate Algebra: An Applied Approach Richard N. Aufmann 2013-03-01 As in previous editions, the focus in ALGEBRA: INTRODUCTORY & INTERMEDIATE remains on the Aufmann Interactive Method (AIM). Students are encouraged to be active participants in the classroom and in their own studies as they work through the How To examples and the paired Examples and You Try It problems. Student engagement is crucial to success. Presenting students with worked examples,

and then providing them with the opportunity to immediately solve similar problems, helps them build their confidence and eventually master the concepts. Simplicity is key in the organization of this edition, as in all other editions. All lessons, exercise sets, tests, and supplements are organized around a carefully constructed hierarchy of objectives. Each exercise mirrors a preceding objective, which helps to reinforce key concepts and promote skill building. This clear, objective-based approach allows students to organize their thoughts around the content, and supports instructors as they work to design syllabi, lesson plans, and

other administrative documents. New features like Focus on Success, Apply the Concept, and Concept Check add an increased emphasis on study skills and conceptual understanding to strengthen the foundation of student success. The Sixth Edition also features a new design, enhancing the Aufmann Interactive Method and making the pages easier for both students and instructors to follow.
