IT Strategy for Non-IT Managers Amrit Tiwana 2017-09-15 How non-IT managers can turn IT from an expensive liability into a cost-effective competitive tool. Firms spend more on information technology (IT) than on all other capital assets combined. And yet despite this significant cash outlay, businesses often end up with IT that is uneconomical and strategically feeble. What is missing in many organizations' IT strategy is the business acumen of managers from non-IT departments. This book presents tools for non-IT managers to turn IT from an expensive liability into a cost-effective competitive tool. It equips readers with the concepts and analytical skills necessary to understand IT needs and opportunities from both sides of the business-IT divide. Each chapter opens with a jargon decoder—nontechnical explanations of the key ideas in the chapter—and ends with a checklist summarizing non-IT factors to consider in IT decisions. Chapters cover such topics as infusing competitive firepower into IT strategy; amalgamating software and data for a hard-to-duplicate competitive advantage; making choices that meet today's business needs without handicapping future strategy; establishing who decides what about IT strategies; sourcing IT and its challenges; protecting IT assets against disaster in ways that IT professionals cannot; and recognizing the business potential of emerging technologies. Examples are drawn from large corporations, small businesses, and nonprofits around the world. The book is suitable for use in the MBA core IT course, and is aimed especially at students in professional or executive MBA programs. It will also be a valuable reference for managers.

Business Voyages Richard John Stapleton 2008-07-15 In his tour de force, of Business Voyages, Professor Stapleton combines the values of his pioneering American family, the leadership learned from quarterbacking winning football teams, the insights gained from decades of teaching future CEOs, and practical commercial acumen into a must-read chronicle for those seeking to recover from the economic chaos

gripping our nation. William John Cox, public interest lawyer, retired prosecutor, Business Voyages is four books in one—it is an autobiography (so that we learn something about the author), a brief guide to transactional analysis (to learn briefly about scripts, ego states and games that people play), a small business case book (to learn from others) and it is a book for entrepreneurs (inviting them to look at the available web and other resources, encouraging them to plan a business voyage and challenging them to actually go on that voyage). The entrepreneurs will smile as they go through this book and just look forward to so much that life can bring. From a business learning and teaching viewpoint this book has much to offer. (Dr.) Bill Dimovski, Former student and now Senior Lecturer in Finance, Deakin University, Australia, and a director of various companies engaged in construction and retail activities. In an informative chapter called “Games Educators Play,” Richard Stapleton applies his expertise in management and mathematics to a persistent and vexing question: what weight should be given to university students' ratings of their professors. In a significant addition to the debate, Stapleton's hard data show that neither professors nor their students are well served when student ratings are used in personnel decisions. Judith D. Fischer, Associate Professor of Law, Louis D. Brandeis School of Law, University of Louisville, Louisville, Kentucky In the storms of a postmodern age rife with narcissism, incompetence, fanaticism, greed and desperation, Business Voyages charts a course toward a more just and dependable economic society. It provides lessons for business schools, politicians, corporate CEOs, entrepreneurs, small business owners and citizens – for all of us - to help discover and co-construct better business worlds for all people around Earth.
